Plasma Chemistry

Alexander Fridman

Plasma Chemistry Alexander Fridman

This unique book provides a fundamental introduction to all aspects of modern plasma chemistry. The book describes mechanisms and kinetics of chemical processes in plasma, plasma statistics, thermodynamics, fluid mechanics, and electrodynamics, as well as all major electric discharges applied in plasma chemistry. The book considers most of the major applications of plasma chemistry from electronics to thermal coatings, from treatment of polymers to fuel conversion and hydrogen production, and from plasma metallurgy to plasma medicine. The book can be helpful to engineers, scientists, and students interested in plasma physics, plasma chemistry, plasma engineering, and combustion, as well as in chemical physics, lasers, energy systems, and environmental control. The book contains an extensive database on plasma kinetics and thermodynamics as well as a lot of convenient numerical formulas for practical calculations related to specific plasma-chemical processes and applications. The book contains a large number of problems and concept questions that are helpful in university courses related to plasma, lasers, combustion, chemical kinetics, statistics and thermodynamics, and high-temperature and high-energy fluid mechanics.

From reader reviews:

Curtis Dugan:

Information is provisions for people to get better life, information currently can get by anyone with everywhere. The information can be a understanding or any news even a concern. What people must be consider when those information which is within the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you find the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Plasma Chemistry as your daily resource information.

Callie Allen:

This book untitled Plasma Chemistry to be one of several books that best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit in it. You will easily to buy that book in the book store or you can order it by using online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Touch screen phone. So there is no reason to you to past this book from your list.

Jennifer Bell:

The reserve with title Plasma Chemistry possesses a lot of information that you can learn it. You can get a lot of help after read this book. That book exist new knowledge the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This specific book will bring you throughout new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Roosevelt Alday:

Is it you who having spare time then spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Plasma Chemistry can be the solution, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these textbooks have than the others?
