## Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)

Many factors are relevant in making the proper choice of food packaging material, including those related to shelf life and biodegradability. To meet these demands, new processing and preservation techniques have arisen, most notably modified atmosphere packaging (MAP) and active packaging (AP). **Modified Atmosphere and Active Packaging Technologies** presents an overview of the current status of MAP and AP, exploring techniques, methodologies, applications, and relevant legislation.

For clarity and easy reference, the book is divided into seven convenient sections:

- **Principles, Materials, Gases, and Machinery for MAP** provides a basic overview of the topic and defines modified atmosphere, controlled atmosphere, and active packaging.
- **Safety and Quality Control of MAP Products** examines the effect of MAP on various foods and discusses governmental control mechanisms to ensure food safety.
- **Applications of MAP in Foods of Animal Origin** explores how MAP can be used in fish, meat, poultry and dairy products.
- **Applications of MAP in Foods of Plant Origin** discusses MAP for cereals, minimally processed vegetables, fruits, and bakery products.
- **Other Applications of MAP** reviews MAP's use in ready-to-eat (RTE) foods and coffee, tea, beer, and snack foods.
- **Active Packaging and its New Trends** examines issues related to nanotechnology and bioactive packaging.
- **Consumer Behavior/Sensory Analysis and Legislation** covers legislation in the European Union, the United States, and Canada and presents conclusions and new issues on the horizon.

From the very basics (films, gases, techniques, and applications) up to the latest advances (nanotechnology and bioactive compounds), this book covers nearly all issues related to MAP and AP, providing an essential reference for food scientists and engineers, agriculturalists, chemists, and all those on the cutting edge of food packaging.

### **From reader reviews:**

#### **Sharon Hall:**

In other case, little folks like to read book Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering). You can choose the best book if you want reading a book. As long as we know about how is important a new book Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering). You can add understanding and of course you can around the world by just a book. Absolutely right, simply because from book you can realize everything! From your country until foreign or abroad you can be known. About simple thing until wonderful thing you can know that. In this era, we could open a book or searching by internet product. It is called e-book. You need to use it when you feel fed up to go to the library. Let's learn.

#### **Cornell Smith:**

Now a day those who Living in the era everywhere everything reachable by connect to the internet and the resources inside it can be true or not need people to be aware of each data they get. How people have to be smart in obtaining any information nowadays? Of course the reply is reading a book. Looking at a book can help people out of this uncertainty Information especially this Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) book since this book offers you rich data and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it everbody knows.

#### **Melvin Dove:**

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you never know the inside because don't ascertain book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) why because the amazing cover that make you consider regarding the content will not disappoint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly show you to pick up this book.

#### **Jackie Frost:**

The book untitled Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) contain a lot of information on it. The writer explains her idea with easy method. The language is very clear and understandable all the people, so do definitely not worry, you can easy to read it. The book was compiled by famous author. The author will bring you in the new period of time of literary works. You can read this book because you can please read on your smart phone, or model, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice learn.
