## **Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) Kasimir Fajans**

A pioneer researcher in the field of radioactivity and isotopes, Kasimir Fajans discovered the radioactive displacement law simultaneously with Frederick Soddy of the United Kingdom. The Polish-born physicist taught at the University of Michigan for more than 20 years; and in this concise and systematic study, he surveys groundbreaking research in the study of radioactivity and isotopy.

The first part explores radioelements and isotopes, particularly the origin of the actinium series and the stability of isotopes. The second part examines chemical forces and optical properties, starting with an outline of atomic and crystal structures and the ideal ionic linkage. General remarks on the deformability of ions follow, with discussions of the change of the refractivities of ions in molecules and crystals, the transitions between ideal ionic linkage and non-polar linkage, adsorption of ions on salt-like crystals with applications to volumetric analysis, and photochemical applications of ion adsorption.

### **From reader reviews:**

#### **Lee Parkin:**

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite book and reading a e-book. Beside you can solve your problem; you can add your knowledge by the e-book entitled Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions). Try to the actual book Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) as your good friend. It means that it can get your friend when you sense alone and beside associated with course make you smarter than previously. Yeah, it is very fortunate for you personally. The book makes you a lot more confidence because you can know almost everything by the book. So , we should make new experience and also knowledge with this book.

#### **Walter Harman:**

Your reading sixth sense will not betray you, why because this Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) reserve written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written throughout good manner for you, leaking every ideas and creating skill only for eliminate your own hunger then you still uncertainty Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) as good book but not only by the cover but also with the content. This is one publication that can break don't determine book by its deal with, so do you still needing yet another sixth sense to pick this specific!? Oh come on your studying sixth sense already told you so why you have to listening to an additional sixth sense.

#### **Lidia Flynn:**

Many people spending their moment by playing outside having friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to invest your whole day by looking at a book. Ugh, do you consider reading a book can really hard because you have to use the book everywhere? It okay you can have the e-book, taking everywhere you want in your Mobile phone. Like Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) which is keeping the e-book version. So , why not try out this book? Let's observe.

#### **Elizabeth Bello:**

Don't be worry if you are afraid that this book may filled the space in your house, you might have it in e-book approach, more simple and reachable. This kind of Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions) can give you a lot of friends because by you checking out this one book you have matter that they don't and make an individual more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you

information that probably your friend doesn't learn, by knowing more than additional make you to be great individuals. So , why hesitate? Let me have Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances (Dover Phoenix Editions).
