Safety Design for Space Operations: Chapter 7. On-Orbit Mission Control Tommaso Sgobba, Firooz A. Allahdadi

This chapter is divided into three sections. The first discusses Mission Control Center (MCC) design and operations. This covers the need for and purpose of the MCC and then details structure, operations, design considerations, and mitigation of external events. The second section, on hazardous commands identification and control, explores identification of hazardous commands and then, implementation, including two-step commanding and error prevention, giving the International Space Station life support system as an example. The final section, on flight rules, covers the history of flight rules and their application, use and purpose in space flight, including their documentation and production process.
