Resilience and the Virtue of Fortitude: Aquinas in Dialogue with the Psychosocial Sciences Craig Steven Titus

Empirical research and virtue ethics find a fitting match in their respective studies of resilience and fortitude. The concept of resilience involves personal and social capacities to cope with difficulty, resist destruction under hardship, and construct something positive out of an otherwise negative situation. Although the concept is new, the human phenomenon is ancient. It has been attested to for millennia by poets, philosophers, and spiritual writers who have praised it in the language of the virtues.

In addition to examining empirical resilience research, this book offers?at philosophical and theological levels?a basis for a hearty understanding of the human person in terms of the virtues that enable human beings to overcome difficulty when they are faced with fear and suffering, or when they are in need of imaginative daring and hope. The primary such virtue is fortitude. The present study employs the thought of Thomas Aquinas and his sources on fortitude and its related virtues, while taking his dialogal method as a basis for critically appropriating reflections from other perspectives as well.

The book offers a renewed, classic vision of the human person and the ordering of the sciences as read through the complementary and, at one level, corrective insights of empirical psychosocial studies on resilience. Such a vibrant natural-law approach to ethical norms and moral development offers guidelines and a framework for understanding human resilience. Moreover, it recognizes a theological transformation of such human capacities?a spiritual resilience?by proposing the New Law of grace, Christ's teaching, and the infused virtues as vital bases for Christian ethics.

Craig Steven Titus is research professor at the Institute for the Psychological Sciences, as well as lecturer and researcher at the University of Fribourg, Switzerland. In addition to serving as coeditor of Servais Pinckaers's *The Pinckaers Reader*, he is the editor of *The Person and the Polis*.

PRAISE FOR THE BOOK:

"With admirable deftness and an impressive command of contemporary research into Aquinas's moral anthropology and the psychosocial sciences, Titus brings Aquinas's moral anthropology into dialogue with modern psychology and shows how each has much to learn from the other. . . . Anyone looking for a scholarly treatment of these subjects will do well to study this important and groundbreaking work." ? Giuseppe Butera, *Religious Studies Review*

"In this scholarly and closely reasoned book, Titus puts the findings of psychosocial sciences into a

conversation, as he calls it, with Thomas Aquinas' moral theory. Aquinas' discussion of the virtues and his philosophical anthropology in many ways anticipate some of the findings of science, so by putting the two into a detailed dynamic tension, the author enhances the value of both. He then goes on to apply these results to achieve a deeper understanding of Catholic moral theology. . . . [T]he arguments presented in this book open new territory for those interested in the study of Aquinas and the broader field of virtue ethics." ? Glen Ebisch, *Catholic Library World*
