Develop the knowledge and skills you need to become a research-literate, evidence-based practitioner with this user-friendly book. Mirroring the way practicing nurses read research reports, the book begins with a research article's conclusion—the section that most directly addresses the clinical meaning of a research study—and works “backward” through each section in the research article.

Organized around user-centered questions, such as how conclusions were reached, which patients the conclusions apply to, and how the study was done, each chapter begins with a clinical case that identifies the clinical question the nurse is seeking to answer and one or two published research articles that directly relate to the clinical case.

- See the relevance of research to clinical practice through the authors' unique approach that helps you learn about research methodology in a natural, intuitive way.
- Explore the ways that becoming research literate will help your clinical practice with **Rebar & Gersch Evidence-Based Bridge Theory**.
- Increase your understanding of difficult, abstract concepts through visually dynamic graphics.
- Broaden your knowledge with enhanced coverage of two important forms of nursing research—systematic reviews and mixed method research, including the AAAAA Evidence-Based Practice Model.
- Become a savvy consumer of research with an easy-to-understand review of the basic statistical information necessary for interpreting research studies.
- Access clinical cases that reflect nursing practice in a variety of settings, from acute care to public health and across a range of specialties.
- Find the information you need fast with anytime, anywhere access to the fully searchable text online.

From reader reviews:

Miguel Willis:

Have you spare time for any day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a move, shopping, or went to often the Mall. How about open or even read a book entitled Understanding Research for Evidence-Based Practice? Maybe it is to be best activity for you. You realize beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with the opinion or you have different opinion?

Cathleen Read:

People live in this new time of lifestyle always try and and must have the time or they will get lot of stress from both day to day life and work. So , when we ask do people have extra time, we will say absolutely sure. People is human not only a robot. Then we question again, what kind of activity have you got when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative with spending your spare time, the book you have read is usually Understanding Research for Evidence-Based Practice.

Billy Stinson:

This Understanding Research for Evidence-Based Practice is great reserve for you because the content that is certainly full of information for you who all always deal with world and also have to make decision every minute. This specific book reveal it data accurately using great organize word or we can declare no rambling sentences inside. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but hard core information with lovely delivering sentences. Having Understanding Research for Evidence-Based Practice in your hand like finding the world in your arm, data in it is not ridiculous a single. We can say that no reserve that offer you world throughout ten or fifteen moment right but this reserve already do that. So , it is good reading book. Hi Mr. and Mrs. occupied do you still doubt which?

Jose Garcia:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher with their students. Many kinds of hobby, All people has different hobby. And you also know that little person like reading or as examining become their hobby. You should know that reading is very important and also book as to be the issue. Book is important thing to provide you knowledge, except your own teacher or lecturer. You find good news or update with regards to something by book. Many kinds of books that can you choose to adopt be your object. One of them are these claims Understanding Research for Evidence-Based Practice.
