This controversial new look at democracy in a multicultural society considers the ideals of political inclusion and exclusion, and recommends ways to engage in democratic politics in a more inclusive way. Processes of debate and decision making often marginalize individuals and groups because the norms of political discussion are biased against some forms of expression. *Inclusion and Democracy* broadens our understanding of democratic communication by reflecting on the positive political functions of narrative, rhetorically situated appeals, and public protest. It reconstructs concepts of civil society and public sphere as enacting such plural forms of communication among debating citizens in large-scale societies. Iris Marion Young thoroughly discusses class, race, and gender bias in democratic processes, and argues that the scope of a polity should extend as wide as the scope of social and economic interactions that raise issues of justice. Today this implies the need for global democratic institutions. Young also contends that due to processes of residential segregation and the design of municipal jurisdictions, metropolitan governments which preserve significant local autonomy may be necessary to promote political equality. This latest work from one of the world's leading political philosophers will appeal to audiences from a variety of fields, including philosophy, political science, women's studies, ethnic studies, sociology, and communications studies.
