Big Java: Early Objects Cay S. Horstmann
This book introduces programmers to objects at a gradual pace. Optional example modules are
included using Alice and Greenfoot. The examples feature annotations with dos and don'ts along with cross
references to more detailed explanations in the text. New tables show a large number of typical and
cautionary examples. New programming and review problems are also presented that ensure a broad
coverage of topics. Cay will also add sections on problem solving, and a new, more approachable and visual
design developed for JfE and BJLO is used.
