Web Performance Tuning, 2nd Edition (O'Reilly Internet)

Patrick Killelea

Web Performance Tuning, 2nd Edition (O'Reilly Internet) Patrick Killelea

As long as there's been a Web, people have been trying to make it faster. The maturation of the Web has meant more users, more data, more features, and consequently longer waits on the Web. Improved performance has become a critical factor in determining the usability of the Web in general and of individual sites in particular. *Web Performance Tuning, 2nd Edition* is about getting the best possible performance from the Web. This book isn't just about tuning web server software; it's also about streamlining web content, getting optimal performance from a browser, tuning both client and server hardware, and maximizing the capacity of the network itself. *Web Performance Tuning* hits the ground running, giving concrete advice for quick results -- the "blunt instruments" for improving crippled performance right away. The book then shifts gears to give a conceptual background of the principles of computing performance. The latter half of the book examines each element of a web transaction -- from client to network to server -- to find the weak links in the chain and show how to strengthen them. In this second edition, the book has been significantly expanded to include:

- New chapters on Web site architecture, security, reliability, and their impact on performance
- Detailed discussion of scalability of Java on multi-processor servers
- Perl scripts for writing web performance spiders that handle logins, cookies, SSL, and more
- Detailed instructions on how to use Perl DBI and the open source program gnuplot to generate performance graphs on the fly
- Coverage of rstat, a Unix-based open source utility for gathering performance statistics remotely

In addition, the book includes many more examples and graphs of real-world performance problems and their solutions, and has been updated for Java 2. This book is for anyone who has waited too long for a web page to display, or watched the servers they manage slow to a crawl. It's about making the Web more usable for everyone.

From reader reviews:

Lorenzo Davis:

As people who live in often the modest era should be upgrade about what going on or information even knowledge to make these individuals keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by looking at books. It is a good choice for yourself but the problems coming to a person is you don't know which one you should start with. This Web Performance Tuning, 2nd Edition (O'Reilly Internet) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Timothy Rocha:

Your reading 6th sense will not betray an individual, why because this Web Performance Tuning, 2nd Edition (O'Reilly Internet) reserve written by well-known writer who really knows well how to make book that may be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your hunger then you still doubt Web Performance Tuning, 2nd Edition (O'Reilly Internet) as good book but not only by the cover but also by content. This is one guide that can break don't evaluate book by its deal with, so do you still needing one more sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to an additional sixth sense.

Sherrill Height:

Don't be worry for anyone who is afraid that this book will filled the space in your house, you may have it in e-book approach, more simple and reachable. This specific Web Performance Tuning, 2nd Edition (O'Reilly Internet) can give you a lot of pals because by you checking out this one book you have matter that they don't and make anyone more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that probably your friend doesn't recognize, by knowing more than additional make you to be great people. So , why hesitate? Let me have Web Performance Tuning, 2nd Edition (O'Reilly Internet).

Mildred Ralph:

As a college student exactly feel bored to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just small students that has reading's spirit or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Web Performance Tuning, 2nd Edition (O'Reilly Internet) can make you truly feel more interested to read.
