Effectively **prepare for certification, increase your knowledge, and improve your image interpretation skills** using the proven and popular Case Review approach! In this new edition, Drs. John P. McGahan, Sharlene A. Teefey, and Laurence Needleman present **127 clinically relevant cases** with associated images, multiple-choice questions, and rationales - organized by degree of difficulty and designed to reinforce your understanding of the essential principles needed to interpret a wide range of general and vascular ultrasound images.

- **Study efficiently with content that mimics the format of board exams** as well as the everyday clinical experience - offering highly effective preparation for certification, recertification, and practice.
- **Build your skills in a cumulative way** by progressing through three overall categories, from least to most difficult, with separate sections for Opening Round, Fair Game, and Challenge cases.
- **Gain new understanding from dozens of unknown cases** reflecting the most recent changes in abdominal and small part ultrasound, including the scrotum and thyroid.
- **Understand the recent changes in the complexities of vascular ultrasound** of the carotid, transplants, and extremities.
- **Stay up to date with new thyroid cases and musculoskeletal cases**, including rheumatoid arthritis and shoulder ultrasound.
- **Expand your awareness** of physics, state-of-the-art instrumentation, and common artifacts with added new content.
- **Clearly visualize what you're likely to see on exams and in practice** thanks to new images -- including color Doppler images.
