Paradigms of Research for the 21st Century: Perspectives and Examples from Practice (Counterpoints)

Paradigms of Research for the 21st Century: Perspectives and Examples from Practice (Counterpoints)

What is research and who is a researcher? Why engage in research and what can be its value? How do we come to know what lies beyond our horizons? *Paradigms of Research for the 21st Century* opens the door for wondering about these and other questions pertaining to the nature and process of educational research. It offers an insightful and detailed account of Western and non-Western philosophical traditions and perspectives on reality, knowledge, and values that have been responsive to past and present developments of educational research in North America. These accounts form a paradigm - a system of inquiry, a model, or a way of knowing. Empirical-analytic, pragmatic, interpretive, critical, poststructuralist, and transcendental paradigms are distinguished as an alternative to a quantitative-qualitative typology of paradigms in educational research. This book can be used for introductory and advanced research methods courses at the master's and doctoral levels.
