Data Preprocessing For Chemometric and Metabonomic Analysis

David E Axelson Phd

Data Preprocessing For Chemometric and Metabonomic Analysis David E Axelson Phd

Data preprocessing is a critical part of chemometric / metabonomic / metabolomic data analysis. This book is an introduction to many of the critical concepts involved. The best preprocessing methods will be the ones that ultimately produce a robust model with the most accurate predictive ability. Unfortunately, there are no particularly straightforward rules to guide investigators to the best selection of preprocessing options; the subsequent trial and error optimization process may be quite time consuming and confusing. However, spending little or no time investigating preprocessing options is likely to result in less than optimal results. The primary objective of this book is to present a relatively focused outline of the major options available for data analysis. The most frequently used methods are noted to varying degrees of elaboration; the more useful methods are discussed in more detail. Some of the selected topics are noted below. Chapter 1 Introduction Problems / Challenges. Reproducibility Issues. Chapter 2 Scaling Mean Centering. Autoscaling. Pareto Scaling. Range Scaling. Level Scaling. Log Transformation. Probabilistic Quotient Normalization. Variable Stability Scaling. Binning. Orthogonal Signal Correction. Histogram Matching. Chapter 3 Preprocessing Savitzky-Golay. Differentiation. Smoothing. Baseline Correction. Wavelets. Denoising. Peak Alignment. Chapter 4 Sample Subset Selection Sample Size. Representativity. Training / Testing / Validation Sample Selection. Outliers. Bootstrapping. Cross Validation. Mahalanobis Distance. Kennard-Stone. Duplex. SPXY. Rank Select. Kohonen Neural Networks. Chapter 5 Variable Subset Selection Missing Values. Imputation. Chance. Generalizability. Bias. Filter/Wrapper/Embedded Methods. Information Leak. F-test. T-test. Fisher Index. Chi-square test. Wilcoxon rank sum. ANOVA. Linear Discriminant Analysis. Principal Component Analysis. Partial Least Squares. IntervalPCA. IntervalPLS. VIP. Non-orthogonalized PLS. Outer Product Analysis. Uninformative Variable Elimination. Genetic Algorithms. Mutual Information. Particle Swarm Optimization. Ant Colony Optimization. CART. Back-Propagation Neural Networks, Probabilistic Neural Networks. Bayesian Belief Network. Support Vector Machines. Minimum Redundancy-Maximum Relevance. Random Forest. Independent Component Analysis. .. and many more.

From reader reviews:

Kevin Buckley:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the Mall. How about open or read a book titled Data Preprocessing For Chemometric and Metabonomic Analysis? Maybe it is to be best activity for you. You know beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with its opinion or you have other opinion?

Stevie Mozingo:

Hey guys, do you would like to finds a new book to learn? May be the book with the title Data Preprocessing For Chemometric and Metabonomic Analysis suitable to you? Typically the book was written by famous writer in this era. The book untitled Data Preprocessing For Chemometric and Metabonomic Analysis the main of several books in which everyone read now. This specific book was inspired many people in the world. When you read this publication you will enter the new dimension that you ever know just before. The author explained their strategy in the simple way, consequently all of people can easily to know the core of this book. This book will give you a wide range of information about this world now. In order to see the represented of the world in this particular book.

Freddie Patton:

Does one one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you never know the inside because don't evaluate book by its handle may doesn't work is difficult job because you are afraid that the inside maybe not while fantastic as in the outside look likes. Maybe you answer might be Data Preprocessing For Chemometric and Metabonomic Analysis why because the excellent cover that make you consider regarding the content will not disappoint you. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly direct you to pick up this book.

James Johnson:

You may spend your free time to study this book this guide. This Data Preprocessing For Chemometric and Metabonomic Analysis is simple bringing you can read it in the area, in the beach, train and soon. If you did not have much space to bring the particular printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
