RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication

Klaus Finkenzeller

RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication Klaus Finkenzeller

This is the third revised edition of the established and trusted *RFID Handbook*; the most comprehensive introduction to radio frequency identification (RFID) available.

This essential new edition contains information on electronic product code (EPC) and the EPC global network, and explains near-field communication (NFC) in depth. It includes revisions on chapters devoted to the physical principles of RFID systems and microprocessors, and supplies up-to-date details on relevant standards and regulations.

Taking into account critical modern concerns, this handbook provides the latest information on:

- the use of RFID in ticketing and electronic passports;
- the security of RFID systems, explaining attacks on RFID systems and other security matters, such as transponder emulation and cloning, defence using cryptographic methods, and electronic article surveillance;
- frequency ranges and radio licensing regulations.

The text explores schematic circuits of simple transponders and readers, and includes new material on active and passive transponders, ISO/IEC 18000 family, ISO/IEC 15691 and 15692. It also describes the technical limits of RFID systems.

A unique resource offering a complete overview of the large and varied world of RFID, Klaus Finkenzeller's volume is useful for end-users of the technology as well as practitioners in auto ID and IT designers of RFID products. Computer and electronics engineers in security system development, microchip designers, and materials handling specialists benefit from this book, as do automation, industrial and transport engineers. Clear and thorough explanations also make this an excellent introduction to the topic for graduate level students in electronics and industrial engineering design.

Klaus Finkenzeller was awarded the *Fraunhofer-Smart Card Prize 2008* for the second edition of this publication, which was celebrated for being an outstanding contribution to the smart card field.

From reader reviews:

Jordan Sampson:

This RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book will be information inside this reserve incredible fresh, you will get facts which is getting deeper you actually read a lot of information you will get. This specific RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication without we understand teach the one who reading through it become critical in imagining and analyzing. Don't possibly be worry RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication can bring once you are and not make your bag space or bookshelves' grow to be full because you can have it in the lovely laptop even cellphone. This RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication having very good arrangement in word along with layout, so you will not feel uninterested in reading.

Fabiola Gaylor:

Often the book RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication will bring you to definitely the new experience of reading a book. The author style to clarify the idea is very unique. If you try to find new book you just read, this book very suited to you. The book RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication is much recommended to you to read. You can also get the e-book from the official web site, so you can easier to read the book.

Valerie Gray:

In this period of time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication this reserve consist a lot of the information in the condition of this world now. This book was represented how can the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. Often the writer made some exploration when he makes this book. Honestly, that is why this book ideal all of you.

Teresa Spillman:

A lot of publication has printed but it is unique. You can get it by internet on social media. You can choose the very best book for you, science, comic, novel, or whatever by searching from it. It is named of book

RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication. You can contribute your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make you happier to read. It is most significant that, you must aware about book. It can bring you from one place to other place.
