## COMPASS and Implementation Science: Improving Educational Outcomes of Children with ASD (SpringerBriefs in Psychology) Lisa A. Ruble, John H. McGrew

This Brief examines COMPASS – the Collaborative Model for Promoting Competence and Success – a consultation-based intervention specialized for children with Autism Spectrum Disorder (ASD). Based on the Evidence-Based Practices in Psychology (EBPP) framework, the volume describes the processes that strengthen the expert support relationships between consultant and teacher (i.e., implementation) and between teacher and student (i.e., intervention). In addition, the Brief addresses how consultation methods work within COMPASS, with teachers learning from consultants' implementation methods to tailor instructions that are specific to students' educational and personal factors. This unique framework corresponds with current, widespread research and aims to provide more effective educational services for students with ASD during their crucial formative years.

Topics featured in this text include:

- COMPASS practice outcome based on idiographic assessment and measures of quality.
- Evidence for the efficacy of COMPASS.
- COMPASS implementation quality.
- COMPASS intervention quality and active ingredients.
- Teacher and student internal and external factors impacting COMPASS.

*COMPASS and Implementation Science* is a must-have resource for clinicians, scientist-practitioners, researchers, and graduate students in the fields of child and school psychology, behavioral therapy, and social work as well as rehabilitation, special education, and speech pathology.
