## **How to Disappear and Not Get Caught in 2013: New Identity Theory and Practice for the New Millenium** R Godinez

The modern fugitive needs the most accurate and useful information if he is to be successful. This is Evasion Science 101, a detailed journey into every aspect of the fugitive mindset. Packed with essential websites and resources, this book offers effective techniques on creating a new identity, relocating, disappearing, avoiding capture, and living a new life without looking over your shoulder in fear. Fugitives also need practical advice on changing their old habits and behavior, so they don't screw up the new life they create. This book contains hard, naked honest appraisal of the criminal, and what he needs to change about himself, in order to successfully blend in to free society. Almost all the books on the subject of new identity are outdated, and don't go into enough detail on the "how-to" aspect. This book is a real "how-to" manual, covering everything, in a clear, step-by-step manner. The author chose not to fill the book with junk, just to make a fatter book. This book is the Bible on the subject of Evasion, and not a single sentence is unimportant. Readers will appreciate this manner of writing, after all, do you want a book full of vain war stories, or one with just the right tools you need for the task at hand? Topics covered in detail include: fingerprints, DNA, getting your new birth certificate, identity theft, relocation, extradition, positive mental attitude, essential internet sites, fake ID cards, social scurity cards, DMV paperwork requirements, overcoming setbacks, keeping your secret a secret, finding a job, where to live, dealing with active addictions, replacing old habits with healthier ones, disguises, child support, revoked licenses, famous and infamous fugitives, TV shows like "I Almost Got Away With It", and "America's Most Wanted", sample letters to write for new documents, brand-new methods of getting clean birth and social documents, putting it all together, and much more. Osama and Saddam tried to run and hide, and even with all their millions, they got caught and killed. But you have this book, and if you want your freedom badly enough to apply these principles in every detail, you can have it. So many other books on this subject are garbage, and will get you caught just as soon as you follow their advice. I put the year in the title, so readers will know that this is the most current information in the underground today, and every new edition will have a new year in the title, so you don't gamble your whole life on some old and useless method or intel. I also critique many of the other publications on new identity and evasion, so you don't have to waste your time buying and reading books that are written by the police, or wilderness survivalists, or clowns who just make stuff up. If you've come this far, you can't afford not to take the next step, and make this book your best friend. I included an anonymous email address in the book, so the black hat underground will send me their own knowledge and tips, ensuring that subsequent editions will contain the most helpful and current information out there. And to all of you readers, with your running shoes on, I wrote this book, not to keep you running forever, but to tell you how to get your paperwork in order, in a new place, so you can finally relax. You may never be able to remove the running shoes, but if you apply these principles correctly, you can comfortably stop running, and start living.
